

Enjoy Our Scene!

**Join us on Monday, July 17 at Village Hall
for an opportunity to provide input on the
Draft Master Signage Plan
Village Hall Board Room
4:00 p.m. to 6:00 p.m.**

Project Goals

Village Signage will provide residents and visitors (vehicles, pedestrians, and bicyclists) clear direction to commercial areas, points of interest, recreational amenities, and indicate Village gateways.

Process

The Village has engaged Hitchcock Design Group to lead a three-phase signage design process.

Phase 1: Research, Analysis and Programming

Phase 2: Schematic Design

Phase 3: Signage Master Plan and implementation

Schematic Design: The project team is currently in the middle of this phase and Hitchcock Design Group has developed alternative signage design options for consideration. The Village would now like to invite community input as a basis for refining the preferred family of signage types and to identify priority locations. Additional signs may be added over time as needed.
